

## Aerial Work Platforms

Aerial Work Platform - There are numerous attachments intended for lift trucks that could be used to be able to help expand the functionality of your forklift and allow you to lift objects, handle materials with greater ease or to finish clean-up tasks.

Some accessories were specially used for the blades themselves. For example, blade extensions can be utilized if you need much more blade length, which increases lifting capacity. Fork extensions come in lengths ranging from 48-120 inches. Triangular or rounded accessories are another type utilized whenever moving rolled material in order to make sure it does not roll off of the traditional flat forks.

Examples of lifting accessories comprise pivoting and telescoping crane or boom attachments. They could come in several different styles and are most often intended for transferring poles, metal bars, lumber and different sort of bulky things. Additional attachments like for instance various styles of hook plates and hooks are available to be able to lift stuff utilizing a chain or sling. Slab lifters and magnetic lifters are other stuff which could be utilized along with hook accessories. Slab lifters are specialized attachments which are used for carrying a variety of materials which are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools that attach to your forklift to make moving rolls of carpet easier. The attachment connects onto the lift truck's forks and has a pole which goes through the center of the carpet roll.

There are several different types of lift truck accessories that could be intended for facility maintenance like snow forks. These blades connect to front end loaders and could move materials like soil, snow and dirt. Other popular cleanup accessories consist of standard sweepers and magnetic sweepers. Standard sweepers consist of a broom which the forklift blades connect onto for sweeping big spaces such as warehouse, factory floors and parking lots. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal debris like on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up quick and effortless.

Material spreaders are other accessories used on lift trucks. These spreaders are useful for various applications like for example spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting attachment which many businesses utilize everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are some models existing that are capable of folding up and storing into a smaller space. Work platforms are designed to raise personnel up to an overhead location making use of the lift truck. Larger platform models have extra space for employees in order to bring tools and other necessary stuff for the task. Usually work platforms are made of poly material or steel.
