

## Clark Forklift Part

Clark Forklift Parts - At present, there are no less than 350,000 Clark forklifts performing globally, and upwards of 250,000 operating in North America alone. With five main lines across the globe, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 exclusive brands of lift trucks, with components covering more than 120,000 particular parts for all of its automated equipment. Your regional Clark Supplier is your complete source for availability of all your parts needs offered by Clark Totalift.

Clark's extraordinary Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their consumers and sellers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Driven to offer the highest level of value and service to our users, Clark remains on the leading edge when it comes to improving efficiency and benefiting performance.

Clark Totalift has a really amazing worldwide support network. With over 550 locations worldwide, supplier representation in over 80 countries and 230 locations in North America, their high level of commitment to their clients predominates the materials handling industry.

Clark proudly remains an innovative leader of the industrial equipment industry, revolutionizing protection features such as the operator restraint system. This exceptional dedication to safety is at this time a customary feature on every lift truck.

Clark has a relentless goal to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its manufacturing facilities. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any number of environmental restrictions, thus placing them in a prevailing industry position.

Clark has chosen the structure of "Lean Manufacturing" at all of its assembly facilities because this technique is particularly economical and allows for minimal use of resources. Developed to ensure maximum proficiency, this system is intended to find and acknowledge the most effective methods for manufacturing plant management. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

By working in concert, Clark's product suppliers and engineers communicate towards improving product effectiveness while minimizing costs. The new value engineering agenda combines modern product growth and provides improved customer support and service within the industry.
